DETAILED ACTION

Priority

Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Germany on 10/2/2002. It is noted, however, that applicant has not filed a certified copy of the German parent application as required by 35 U.S.C. 119(b).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hasegawa et al '072. Hasegawa discloses a method for the manufacture of rolled strip segments (leaf springs) of different wall thickness containing most of the claimed elements including, rolling a flexible metal strip so as to form along a length thereof rolled strip segments of different wall thickness (figures 7-8 and figure 20), cutting sheet bars from the flexible rolled strip (cutting done by device 102). The step of position marking for cutting as required by claim 2, is shown as mark (K) provided by marking tool (93). Regarding claim 3, lacking any clear distinguishing features the claimed formations are disclosed as the ends of the leaf springs.

Art Unit: 3725

Hasegawa lacks the teaching of a reshaping step of each sheet bar to a final configuration in at least one forming tool as required by claim 1 and hardening the shaped sheet bar in the hot forming tool as required by claim 1. However, Komarnitsky discloses a method for the formation of leaf springs, which teaches that it is known to incorporate a reshaping step for spring leaf sheet bars (65) to a final configuration in at least one hot-forming tool and hardening the shaped sheet bar in the hot forming tool (figures 8-10) in order to strengthen the spring by relieving stresses and tension as well as harden the spring.

Allowable Subject Matter

Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments filed 5/2/2006 have been fully considered but they are not persuasive. Applicants argue that their invention deals with flexible metal strips while the examiner cited references do not since they are directed to heavy/thick metal leaf springs and are therefore are not flexible. In response the examiner agrees that the references are directed to metal leaf springs and points out that such springs are commonly used in suspensions of automobiles where by their very nature and design are intended to have some flexibility and resilience or otherwise would not be able to

Art Unit: 3725

function as spring mechanisms. It should be noted that applicants discuss a variety of strip dimensions in their arguments, however the argued dimensions are neither claimed nor supported by the original disclosure and therefore do not serve to patentably distinguish.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dmitry Suhol whose telephone number is 571-272-4430. The examiner can normally be reached on Mon - Friday 8:30am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Derris Banks can be reached on (571) 272-4419. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
